# My Pet's Pancreatitis

Hello, your vet has told us that your pet has been to visit them.

They have decided that your pet has pancreatitis (what a odd word) and they have asked us to let you know all about it.

We know when pets are poorly it can be a bit worrying, so we wanted to let you know all about your pet's pancreatitis and hopefully make it a lot less scary!

This pack is full of all sorts of things to help you care for your pet!

Why not draw a picture of your pet in the box?

*My Pet*

# What is Pancreatitis?

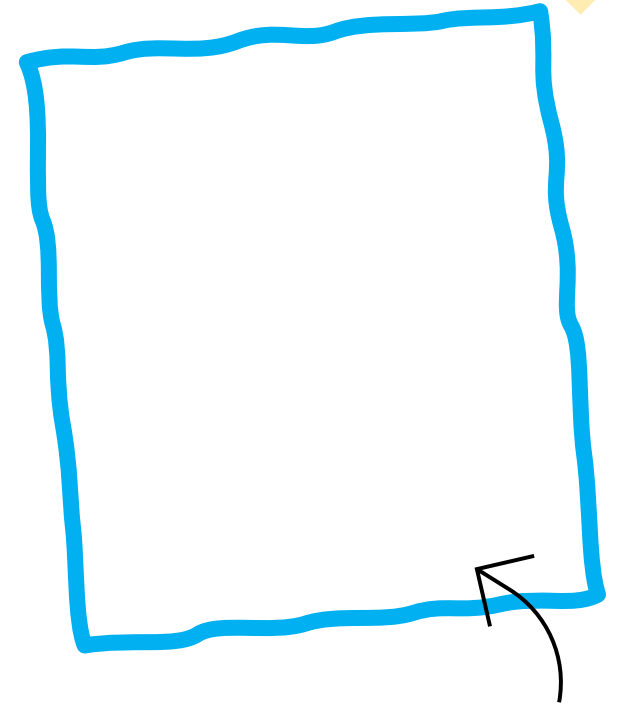

Inside our bodies we have something called a pancreas.

Your pancreas has many important jobs to make our bodies happy and healthy.

Your pet has a pancreas too, just like us. When your pet has a poorly pancreas it can be very painful and make them throw up.

Your vet may say that your pet needs medicine and special food every day.

We all know throwing up is no fun at all, so we want to help you try and help care for your pet with pancreatitis.

My pet's favourite toy is....

# How Can You Help?

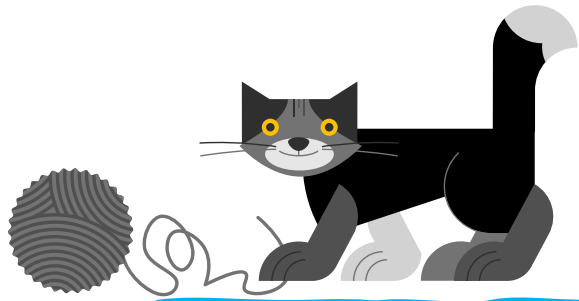

Here are some things that you and your adult can do to help your pet and their poorly pancreas

- ✓ Make sure your pet has fresh water every day, sometimes having pancreatitis can make them very thirsty.
- ✓ If you see your pet throw up, you should tell a grown up straight away.
- ✓ Pets with pancreatitis need to have their own special food, so it is very important that you don't feed them without asking a grown up first.
- ✓ It is good to let your pet have space if they are sore or ill, which is why you need to give your pet space when they are not feeling their best.
- ✓ Your grown up can make sure they get their medicine that they need to help them feel well.

Remember to never climb on your pet or pull them around as this may hurt them.

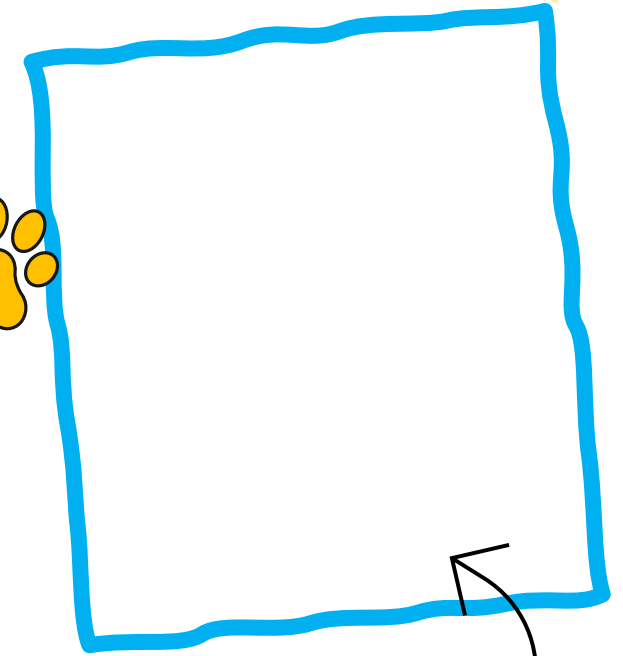

# Being Safe with Medicine

Pets with pancreatitis might need to take medicine everyday to help their pancreas work properly. This medicine has been picked by a vet and is perfect for your pet!

Here are some rules about medicine:

- You must never touch your pet's medicine as it can be dangerous for children.
- Medicine should only be given to your pet by a grown up.
- The medicine for your pet should be kept out of the way.
- If you ever find your pet's medicine, you should tell an adult who can put it away in a safe place.

My pet's favourite food is....

# My Pets Pancreatitis Diary

Why not keep a diary of how your pet is doing with their poorly pancreas?

Todays Tasks	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday
My pet has been fed it's special food today?							
My pet has fresh water today?							
My pet has taken it's medicine?							
My pet has had a little exercise?							
My pet is happy today?							
I told my pet I love them today							

Great work!

Remember to tell your pet how good they are each day!

# The Vetsure Kids Good Ownership Award

This awards goes to
